

## PASSION FOR MOTION

**INGENIA** is a company dedicated to the science of motion control since 2006. We design and produce off-the-shelf and customized solutions to answer the industry need for increasingly complex, high-tech motion control applications.

**INGENIA's** offering includes high performance - high power density servo drives and powerful control software for most motor technologies including servo motors (DC brush and brushless), microstepping, and step motors. Advanced features include field buses (CANopen, EtherCAT, Ethernet/IP), sinusoidal commutation, field oriented control, advanced PID filters and much more.

# WHAT WE DO

## PRODUCTS

### **Motion Control Solutions Innovative and User-Friendly**

High-performance, cost-effective and easy-to-use products for motion control. Products portfolio includes Servo Drives and control software compatible with latest industrial protocols such as CANopen, EtherCAT or Ethernet/IP.

## CUSTOMIZED DESIGNS

### **Tailored motion solutions that deliver maximum value**

INGENIA's strength lies in its customization capabilities. We do what it takes to meet your requirements and create a product that is perfect for its desired use.

Our modular design approach is based on electronic building blocks that have been tried and tested for specific industry requirements, thus reducing development time and guarantee an outstanding quality.
